Forecast for Saturday 08 Jan 2022

Weather: The hours of darkness will be windy with extensive low cloud and snow spreading from the west, although this gradually turning to rain below 900 metres or so as freezing levels rise. Snow may persist across the Trossachs well into the night. Then drier and brighter weather will soon spread east after dawn with a few snow or hail showers, snow falling down to 400 to 600 metres by the afternoon as colder air returns from the west. A small chance of some coastal lightning.

Chance of cloud free mountain/hill tops above 800m: 80% after dawn

Visibility: Outside of cloud and snow expected very good visibility with good air clarity. Becoming quickly poor in snow with cloud lowering to 700 metres as showers pass by.
